

Change the welcome text on my home page

Last Modified on 08/03/2023 2:53 pm EDT

By default, your new knowledge base will display a title at the top saying "Welcome to...." with the knowledge base name after it. We populate this text based on the name you initially picked out for your knowledge base.

If you want to change that text, there are a couple different ways to do it.

If you just want to update the portion that comes after "Welcome to...": that text is based on the name of your knowledge base as it's defined in **Settings > Basic**. If you want to rename your knowledge base completely (which will also update that welcome text):

1. Go to **Settings > Basic**.
2. Update the **Knowledge base name**.
3. Be sure to **Save** your changes.

If you want to update the "Welcome to..." text in any other way:

1. Go to **Knowledge Base > Home Page**.
2. Edit the **Home Page Title** text.
3. You can **Preview** your changes to be sure you like them.
4. Then **Save** once you're done.

(You can also [Remove the homepage welcome text](#) completely if you so choose!)

That didn't work...

If editing the Home Page Title in **Knowledge Base > Home Page** doesn't make any changes in your knowledge base, that generally means someone's already customized your home page a bit.

In this case:

1. Go to **Settings > Style**.
2. Below the preview pane, be sure **Custom HTML** is selected.

3. In the Custom HTML dropdown, select **Home Page**.

4. Our default layout includes the title in an h1 with class="hg-article-title xcolor", and someone may have edited the text there. You can update the title to one of your choice here, too!

Custom CSS

Custom HTML

Custom <head>

Custom HTML [Home Page](#) ▾

```
<div class="ko-homepage-top">
  <h1 class="hg-article-title xcolor">Welcome to my new knowledge base!</h1>
  [template("large-search")]
</div>
<div class="hg-article">
  <div class="hg-article-body">
    [homepage("body")]
  </div>
</div>
```

Sample edited title in the default html

5. You can **Preview Changes** to be sure you edited the right thing.

6. Be sure to **Save** once you like the changes you've made.
