

Homepage Merge Codes

Last Modified on 02/13/2025 12:39 pm EST

Here are the available template merge codes for use in **Customize > Style (HTML & CSS) > Custom HTML > Homepage**. These merge codes will only work in the knowledge base homepage; they won't work inside categories or articles.

Homepage merge code	Description
<code>[homepage("title")]</code>	The "title" merge code will display whatever text you have in the Title field under Customize > Homepage > Homepage content. You can change the title there.
<code>[homepage("body")]</code>	The "body" merge code will display the content inside the Custom content field of the Homepage content editor in the left navigation. You can update the content here.
