Homepage Merge Codes

Last Modified on 07/10/2024 1:58 pm EDT

Here are the available template merge codes for use in **Settings > Style > Custom HTML > Homepage.** These merge codes will only work in the knowledge base homepage; they will not work inside categories or articles.

Homepage Merge Code	Description	Example
[homepage("**title**")]	The "title" merge code will display whatever text you have in the **Title** field under **Homepage > Homepage content.** You can change the title there.	NA - will not work in articles
[homepage("**body**")]	The "body" merge code will display the content inside the **Custom content** field of the **Homepage** content editor in the left navigation. You can update the content here.	NA - will not work in articles
