

Display categories open by default

Last Modified on 12/28/2022 12:25 pm EST

Depending on your audience and the size of your knowledge base, you may want to open your categories in the table of contents by default.

To set this up:

1. Go to **Settings > Basic**.
2. In the Table of contents section, check the option to that says "All categories open by default".

- Table of contents**
- ☐ All categories closed by default
 - ☒ All categories open by default
- Sub-categories are not affected by this setting. Can be overridden on a per category basis.
- ☐ Add a search bar to the top of the table of contents
 - ☒ Add a homepage link to the top of the table of contents
 - ☐ Add a glossary link to the top of the table of contents
 - ☐ Add a full PDF download link to the knowledge base table of contents — [manage PDF](#)
- Content**
- ☐ Disable conditional content in articles
 - ☐ Disable the default code syntax highlighter

3. Save and your categories will be open by default.

Note: You can also set individual categories and sub-categories to show as open or closed by editing them and choosing the appropriate override in the **Table of contents display** section in the righthand column:

Restrict Editing to Teams:

No teams
