Add or remove Home link in table of contents

Last Modified on 03/04/2025 3:23 pm EST

While your uploaded logo is automatically linked to your knowledge base homepage, not all readers find this obvious or intuitive.

You may want to add a **Home** link to your table of contents:

KnowledgeOwl has a built-in setting for this. To add or remove the **Home** link to your table of contents:

1. Go to **Customize > Website**.
2. In the **Links and behavior** section, under **Table of contents elements**, check or uncheck the box to **Add a homepage link to the top of the table of contents.**
3. Be sure to **Save** your changes. Your table of contents should update to reflect your changes.

Refer to Website Settings for more information on the other table of contents elements settings.
