

# Display Settings

Last modified on 07/17/2024 12:19 pm EDT

Using the **Display Settings** options in an article, you can limit where the article is displayed in the knowledge base and some functionality within the article itself. The **Display Settings** section is available in the right hand column of the article editor, near the bottom of the page:

The available restrictions are:

- 1. Exclude from search results:** when this box is checked, the article is always hidden from your knowledge base search results. It's still available by URL, and may be available in other navigation and lists depending on the settings you check below. This also adds a `noindex` tag to the individual article or category and excludes it from your [sitemap](#).
- 2. Hide from the table of contents:** this hides the article from the table of contents. If you're using the [Contextual Help Widget 2.0](#), it also hides the article from the **Knowledge** tab in that widget.
- 3. Hide from homepage / category landing page:** this hides the article from the landing page for the category it's found in, or the homepage if the article isn't within a category landing page.
- 4. Hide from article lists:** this hides the article from the homepage/right hand column [New Articles List](#), [Popular Articles List](#), and [Updated Articles List](#). It doesn't hide the article from the [Recent Articles List](#) or [Article Favorites](#).
- 5. Remove "PDF" icon:** this option removes the [PDF download](#) icon from the article. (This might be a good idea for video content, for example.)
- 6. Remove feedback ability:** this option removes the [Ratings](#) section in the article.
- 7. Remove comment ability:** this option removes the [Comments](#) section from the article.
