

SCAYT Spell Check

Last Modified on 07/12/2023 4:32 pm EDT

The SCAYT option is only for those using the Legacy editor. The Modern editor uses the built-in browser spell-check.

Spell check can be enabled by default under **Settings > Basic**. The spell checker tool in the editor is SCAYT, which stands for "spell check as you type".

The SCAYT feature allows you to specify a variety of options, including:

- Ignore All-Caps Words
- Ignore Domain Names
- Ignore Words with Mixed Case
- Ignore Words with Numbers

You can also choose from the following languages:

- American English (default)
- Brazilian Portuguese
- British English
- Canadian English
- Canadian French
- Danish
- Dutch
- Finnish
- French
- German
- Greek
- Italian
- Latin
- Norwegian
- Portuguese
- Spanish
- Swedish

It also allows for an author-generated dictionary that is stored in a browser cookie. Once too large for a cookie, you can store the dictionary in your library.

Most modern browsers have a built in spell checker, which is why the feature is off by default.
