

# Articles Viewed from Remote Pages

Last Modified on 03/16/2023 1:39 pm EDT

This section displays the **Page Paths** of all pages where someone opened the widget and/or where recommended articles have been configured.

You can then use the [Recommended Article Weights](#) link next to each URL to update the order.

Articles Viewed from Remote Pages

When an end user performs a search inside of the embedded widget, we pass through their current URI location. Any subsequent articles viewed will have their search weight incremented slightly to rank higher in search results originating from that URI location. Use the "Recommended Article Weights" links below to alter learned behavior.

Page Path	
/admin/dashboard	<a href="#">Recommended Article Weights</a>
/app/admin-account-settings	<a href="#">Recommended Article Weights</a>
/app/admin-project-new/trial/welcome	<a href="#">Recommended Article Weights</a>
