

Standard PDF export (Full PDF Download)

Last Modified on 10/26/2020 1:37 pm MDT

The Standard PDF Export creates a PDF of your entire knowledge with a clickable table of contents. This PDF can optionally be displayed at the bottom of your table of contents to allow your readers to download an offline version of your content.

The Standard PDF can be customized with the following options:

- Customizable cover page
- Choose whether to include restricted content
- Exclude video content
- Specify A4 vs. US Letter page size
- Add a watermark and/or a password
- Add a custom footer

This Standard PDF will not automatically update as your content is updated; to ensure it's up-to-date, you'll want to periodically come into **Knowledge Base > Exports**, and click the **Save & Regenerate PDF Export** button.
