

# New theme and related articles option!

Last Modified on 12/28/2022 12:24 pm EST

## New theme and related articles option!

We have released the following improvements:

- **Brand new theme: Minimalist**
- **Backward linking related articles**

## Minimalist Theme!

Using the awesome custom themes that you guys have built for your kbs as inspiration, we've come up with a brand new default theme of our own.

Featuring a pared down design with a slide out table of contents, we tried to put the focus on what matters: the content.

Wanna take a look? We've moved our own support knowledge base over to it, [check it out!](#)

## Backward Related Articles!

Under **Settings** → **Basic** → **Website Settings** there is a new option to backward suggest related articles.

Okay this one is a bit hard to explain with words, but we'll do our best!

Say that we have 2 articles: **article A** and **article B**. With this option enabled, if you edit **article A** and add **article B** as a related article, **article B** will also automatically suggest **article A** as related.

Hopefully that makes a bit of sense!
