

Hide Related Articles when there is only one or less

Last Modified on 12/28/2022 12:25 pm EST

You can add some code to hide the Related Articles section when it contains 1 or 0 articles.

To do so:

1. Go to **Settings > Style**.
2. Click on the **Custom HTML** tab.
3. Select **Article** from the dropdown.
4. If your Related Articles section appears in the right hand column of all articles, copy this code. Otherwise, skip to step 5:

```
<script>
//If Related Articles section in righthand column has 1 or 0 articles, hide the section
$(function() {
  if( $('.related-panel ul li').length < 2 )
    $('.related-panel').hide();
});
</script>
```

5. If your Related Articles section appears at the bottom of all articles, copy this code:

```
<script>
//If Related Articles section at bottom of article has 1 or 0 articles, hide the section
$(function() {
  if( $('.ko-related-articles ul li').length < 2 )
    $('.ko-related-articles').hide();
});
</script>
```

6. Paste the code you copied above into the bottom of the Article Custom HTML code editor. For example:

Custom CSS

Custom HTML

Custom <head>

Custom HTML [Article](#) ▾

```
[template("rating")]
[template("comments")]
</div>
</div>

<script>
//If Related Articles section at bottom of article has 1 or 0 articles, hide the section
$(function() {
  if( $('.ko-related-articles ul li').length < 2 )
    $('.ko-related-articles').hide();
});
</script>
```

-- Select a Merge Code --

Save

Example of the script added to hide the Related Articles section at the bottom of articles

7. Be sure to **Save** your changes.
