

Hide Related Articles when there is one or less

Last Modified on 07/01/2026 5:27 pm EDT

The Related Articles section will display regardless of how many articles are in it.

Some authors prefer to hide this section when it contains one or no articles.

To do so:

1. Go to **Customize > Style (HTML & CSS)**.
2. In the **Customize HTML, CSS, and JS** section, select **Custom HTML**.
3. Select **Article** from the **Select HTML section to edit** dropdown.
4. Copy the code below and paste it into the **Article Custom HTML** pane:

```
<script>
//If Related Articles section at bottom of article has 1 or 0 articles, hide the section
$(function() {
  if( $('.ko-related-articles ul li').length < 2 )
    $('.ko-related-articles').hide();
});
</script>
```

5. Be sure to **Save** your changes.
