Make the PDF icon prettier

Last Modified on 03/27/2025 12:31 pm EDT

If you're using the Clayton, Classic, or Modern themes, your PDF icon next to article titles might look like a standard PDF icon, instead of the Font Awesome icon, like this:

URL-based support tools

Last Modified on 06/14/2022 12:02 pm EDT

You can replace it with a Font Awesome icon that will match the other icons next to the article:

(The color of the icon will depend on your knowledge base settings.)

To update your icon to Font Awesome:

1. Go to **Customize > Style (HTML & CSS)**.

2. In the **Customize HTML, CSS, and JS** section, select **Custom HTML**.

3. Select **Article** from the **Select HTML section to edit** dropdown.

4. Copy the code below and paste it into the very bottom of the editor pane:

```
<script>
 //Update PDF icon so it uses Font Awesome PDF icon
 $(function() {
  $('.hg-article-pdf img').replaceWith('<i class="fa fa-file-pdf-o fa-fw"></i>');
 });
</script>
```

5. Be sure to **Save** your changes.
