Upgrades to the new editor (highlights)

- URL detection while typing
- Improved pasting from Word and Excel
- Add trademark character to special characters plugin
- Enable pasting images in Safari from the clipboard
- Add a new line after/before the last/first element when clicking at the bottom/top of it
- Word paste was not detected in IE (fixed)

Feature Requests

- Allow "nodownload" attribute for videos in new editor
- Allow MathML tags in new editor to display equations using MathJax plugin.

Bug Fixes

- HTML zip exports sometimes didn't contain all articles.
- Hide from navigation wasn't hiding from blog style categories.
- New editor was stripping out video attributes to allow fullscreen (webkitallowfullscreen, mozallowfullscreen, allowfullscreen).
- Shared articles were slowing links to deleted kbs.
- You couldn't un-italicize headers in the new editor.
- Editor was stripping out fullscreen and nodownload attributes from video embeds.
- Clicking the table of contents options would make content list options disappear.
