

# HIPAA compliance

Last Modified on 07/01/2025 5:04 pm EDT

Your usage of KnowledgeOwl can be HIPAA compliant if you sign a Business Associate Agreement (BAA) with KnowledgeOwl. BAAs are available for our [Business](#) and [Enterprise](#) customers. Please [contact us](#) to execute a BAA.

## HIPAA Dos and Don't

There are many features in KnowledgeOwl. Some will help with HIPAA-compliance, while others could cause issues. Here are some do's and don'ts if you want to maintain HIPAA compliance:

DO	DON'T
Use unique logins for each author and reader	Share logins
Use <a href="#">Single Sign-On</a> for authentication	Use less secure authentication options like <a href="#">shared passwords</a>
When possible, <a href="#">require authentication</a> to view any image or file from your file library	Use the "remember me" function to keep you logged in
Use <a href="#">teams</a> , <a href="#">groups</a> , and <a href="#">roles</a> to practice the principle of least privilege for access control	Upload files containing PHI to your articles or <a href="#">Files</a> page. Files are not encrypted.
Disable comment notification emails when using <a href="#">comments</a> . (Emails are not encrypted.)	Increase the reader authentication expiration ( <a href="#">Security and access &gt; Security settings</a> ) to keep readers logged in longer than necessarily. Readers should be automatically logged out after a period of inactivity. The default is 2 hours.
Enable <a href="#">Do not store any collected ticket information within KnowledgeOwl</a> when using the <a href="#">contact form</a> if submissions might contain PHI.	Use the <a href="#">Send Email</a> method when using the contact form. Emails are not encrypted.
	Approve any comment submissions containing PHI.

## Deleting data

It's a HIPAA best practice to store PHI in as few places as possible. When you delete items in KnowledgeOwl, they are still stored in a deleted status and are not permanently destroyed by default.

If you realize that you accidentally added PHI to KnowledgeOwl and want to permanently delete it from the database, [contact us](#) to have it destroyed.

# Breach notification rule

The Breach Notification Rule requires KnowledgeOwl, if acting as a business associate, to notify you, the covered entity, of breaches at or by the business associate. We will notify you without unreasonable delay and no later than 60 days from the discovery of the breach.

When possible, we will provide you with the identification of each individual affected by the breach as well as any other available information required to be provided by you in your notification to affected individuals. While you are ultimately responsible for ensuring individuals are notified, you may delegate the responsibility of providing individual notices to us as the business associate.

If you have any questions or would like to lodge a complaint regarding our compliance of the Breach Notification Rule, you can email [support@knowledgeowl.com](mailto:support@knowledgeowl.com). You may also [file an online complaint with the Office of Civil Rights \(OCR\)](#).
