Allow readers to log in through SSO

Last modified on 11/07/2026 12:01 pm EST

Do you already have a single sign-on (SSO) identity provider? You can set up a SAML or OpenID Connect (OIDC) integration to allow your readers to log in using those same credentials. Set up either one in **Security and access > Access & SSO**, in the **Login methods** card.

Review the configuration options available at Single Sign-On (SSO). For OpenID Connect, including ClassLink, start with OpenID Connect (OIDC) SSO overview.
