## Bug fixes:

- Prevent glossary terms with empty values from being created
  - Auto-highlight glossary terms was having an issue if the text that contained the term started with a < symbol
  - Copied knowledge bases were not being properly indexed for search until a reindex was performed
  - Improved protection against categories being moved into one of their own sub-categories
  - Deleting a category from the category editor screen was not triggering a deletion of all sub-content
  - Readers were not able to update their icon when leaving a comment
  - Trying to create a new reader group via the API was throwing an error
-
