Feature Enhancements

- Added more graceful handling of displaying categories in the modern widget. We will display the category contents within the widget itself if we can. If we can't, we provide a link to allow the end-user to open the category in a new tab.
 - We now allow restricted articles to be searched for and added to the Reporting → Widget → Recommended Article Weights page
 - Added a new function to the Modern Slideout widget that will open the widget directly to the contact form. The new function is `__ko16.openContactForm();`
-
