Add ratings to individual articles

Last modified on 07/16/2026 4:43 pm EDT

By default, the Ratings section displays in all articles.

Override this behavior in individual articles by selecting the **Remove feedback ability** option in **Display Settings**.

But if you'd prefer to have the ratings section only in a small number of specific articles, you can remove the template from your articles overall and then add it only to the articles you want. We recommend using a snippet for this so you don't have to remember the template merge code.

First, let's remove the template from all articles:

1. Go to **Customize > Style (Custom HTML & CSS)**. The **Style Settings** page opens.
2. In the **Customize HTML, CSS, and JS** section, select **Custom HTML**.
3. Select **Article** from the **Select HTML section to edit** dropdown.
4. Delete `[template("rating")]` at or around row 19.
5. **Save** your changes.

Now let's create a snippet that contains the template so you can add it to the articles you'd like:

1. In the left navigation, select **Snippets**. The **Snippets** page opens.
2. Select **+ Create New Snippet**. If you're not familiar with creating snippets, refer to **Creating a snippet**.
3. Enter a **Snippet Name**, like `Article Rating section`.
4. Enter a **Snippet Description**, like `Add this snippet to articles to display the ratings section`.
5. Select the **Snippet Content** dropdown and select **Code Editor**:

   Your browser does not support HTML5 video.
6. Copy the code below and paste it into the code editor:

```
[template("rating")]
```

7. Select **Create** to finish creating your snippet.

Now you can insert the snippet into the bottom of any article where you want the ratings section displayed.
