Add search bar to table of contents

Last Modified on 02/18/2025 3:04 pm EST

Though most themes include a search bar in the top navigation, you might want to include a search bar in your table of contents, as well. When added, the search bar displays at the very top of the table of contents, above the Home and Glossary links:

To add a search bar to the top of your table of contents:

1. Go to **Customize > Website**.
2. In the **Links and behavior** section, under **Table of contents elements**, check the box to **Add a search bar to the top of the table of contents**.
3. **Save**. You should now see the search bar at the top of your TOC.

Refer to Website Settings for more information on other settings available in **Customize > Website**.

Change the search bar placeholder
Don't like "Search for articles..." as the placeholder? Learn how to Change your search bar placeholder.
