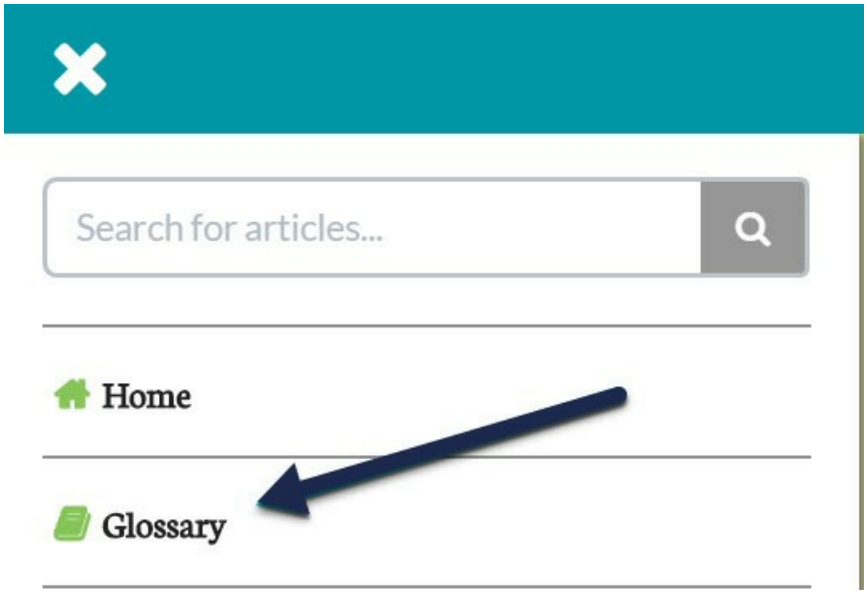
Add glossary link to table of contents

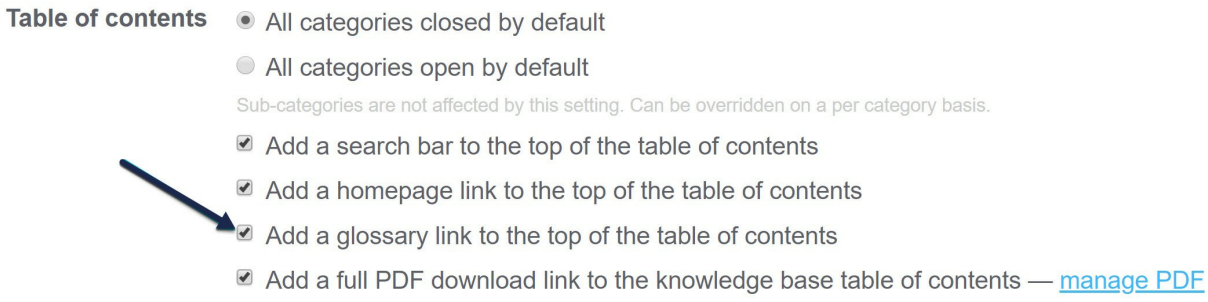
Last Modified on 12/12/2023 10:49 am EST

If you're using the Glossary, you can add a link to the glossary to your table of contents.



To add a glossary link to the top of your table of contents:

1. Go to **Settings > Basic.** (Or, from the **Glossary** page, click the **Edit in settings** link next to "Link in the table of contents.")
2. In the **Table of contents** section, check the box next to "Add a glossary link to the top of the table of contents".



3. **Save.** You should now see the glossary at the top of your TOC.

See Website Settings for more information on other settings available in **Settings > Basic.**
