

Add Related Articles

Last Modified on 12/22/2025 4:51 pm EST

While you can use automatic suggestions for your related articles, for the best control, you'll want to manually suggest them.

To add a Related Article:

1. Open the article or category for editing.
2. In the **Related Articles** section, select **Add article**. The **Add Related Article** modal opens.
3. Enter the article or category title you want to add as a related article. The dropdown autosuggests articles or categories based on what you've typed.
4. Select the article or category, then select **Add Related Article**:
Your browser does not support HTML5 video.
5. Be sure to **Save** the article.

To reorder or remove related articles, follow the instructions in [Reorder or remove Related Articles](#).
