

Add Related Articles

Last Modified on 02/12/2025 10:51 am EST

While you can use automatic suggestions for your related articles, for the best control, you'll want to manually suggest them.

To add a Related Article:

1. Open the article or category for editing.
2. In the **Related Articles** section, select **Add article**.
3. Type the article or category title you want to add as a related article. The dropdown autosuggests articles or categories based on what you've typed.
4. Select the article or category, then select **Add Related Article**.

5. Be sure to **Save** the article.
