

Search results pagination with exact match searches

Last Modified on 12/28/2022 12:24 pm EST

We had reports of a bug in "exact match" searches (those with quotes) that the pagination wasn't working properly. The results were showing multiple pages but as soon as readers clicked into any additional pages, no search results were displayed.

We've fixed this bug so that pagination works properly for these search types now.
