In-app searches now support parentheses

Last Modified on 12/28/2022 12:24 pm EST

Thanks to a customer report, we learned that all of our in-app searches did not support parentheses without escaping them using a \.

We've updated the in-app search so that it now supports parentheses. This updates the following searches:

- In article editor, the **Insert Link to Article** search
- In article editor, the **Related Articles** search
- In article editor, the **Insert Topic Article** search
- In article editor, the change category search (category title search)
- The "Find Articles" search in the lower left corner of Articles and article editor pages
- The Add Article pop-up, Copy from existing search
- The Add Article pop-up, Link content to existing article search
- The **Manage Articles** search
