Versions Make Visible to Groups Fix

Last Modified on 12/28/2022 12:24 pm EST

When using the **Make Visible to Groups** setting in **versions**, we had a report of articles at certain levels of the table of contents hierarchy not showing the versions visible to a group in the TOC, though they could still be accessed by URL. We've pushed a fix for this bug so that Make Visible to Groups should consistently show the visible version in the TOC as well as via URL.
