

Hide tags from Search Results

Last Modified on 12/28/2022 12:25 pm EST

KnowledgeOwl search results will automatically display all tags assigned to a given article :

The screenshot shows the KnowledgeOwl search interface. At the top, there is a teal header with the KnowledgeOwl logo, a search bar containing the text "Search for articles...", and links for "Release notes" and "Contact support". Below the header, the search results are displayed for the query "search". The results list includes:

- 1. Using search**

Tags: search
This section explains the different types of search in KnowledgeOwl and how to use them.
- 2. Customize the search "No Results" message**
Last Updated: 01/30/2019 in Developer documentation » Handy scripts
`//customize the "no results" text on search results screen $(function(){ if($('.hg-search-page') &... & $('.hg-search-page').length > 0) { $('no-results-msg').html(" Replace this with the custom search ... By default, searches that return no results display the text, "No results found": You can customize`
- 3. Configuring search**
Last Updated: 06/17/2019 in Content management » Search
Tags: search
The configuration options in this section will help you fine-tune the behavior of search in your knowledge
- 4. Article blurbs**
Last Updated: 11/16/2018 in Content management » Search » Configuring search
To change your search result article blurbs, go to Settings » Search and make a selection in the Article ... with how Google and

At the bottom of the screenshot, a dark blue banner contains the text: "Sample of Tags showing in Search Results".

However, if you're using tags for [custom filters](#) in the [Manage Articles](#) interface, you might not want those internal tags to be shown in search results.

You can mark tags like this as hidden from readers. Hiding a tag from readers:

- Keeps it visible in the article editor and category editor
- Allows it to be used as a filter in Manage Articles custom filters
- Prevents the tag from appearing in search results in your knowledge base
- Prevents the tag from appearing in the typeahead suggestions when a reader types ":" to begin a tag search

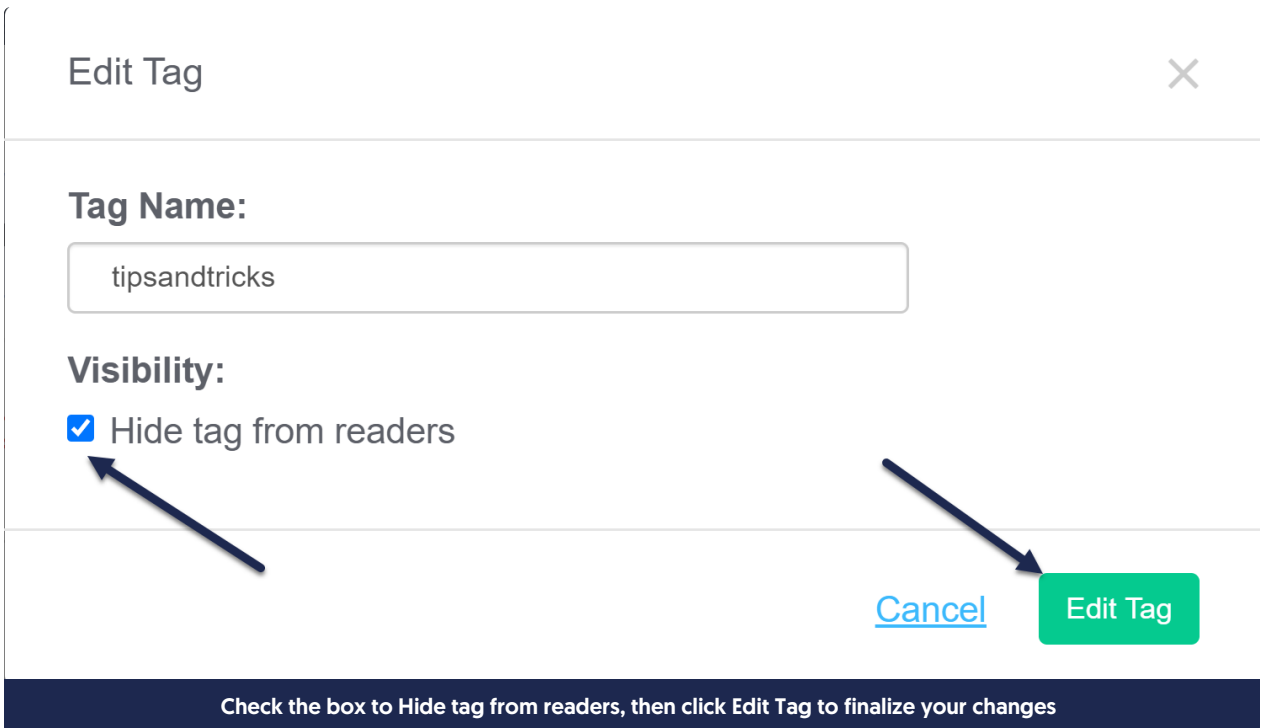

To hide an existing tag from readers:

1. Go to **Library > Tags**.
2. Click to select the tag you'd like to hide from readers.
3. Click on the **Edit link**.

4. In the edit pop-up that appears, under **Visibility**, check the box next to "Hide tag from readers."

5. Click the **Edit Tag** button to finalize your changes.

6. Regular tags will have a normal tag icon in the Tags Library; tags hidden from readers will have a padlock icon. Here, "javascript" is a tag readers can see, and "tipsandtricks" is hidden from readers:
