Widget 2.0 openArticle() & openCategory() bug fix

Last Modified on 12/28/2022 12:24 pm EST

When using the functions to open Widget 2.0 directly to **a specific article or category**, we noticed that breadcrumbs sometimes got skewed, especially with the `openCategory()` function when the category was a subcategory in the second or third layer of the hierarchy.

We fixed this bug so that using those functions should consistently show the correct breadcrumbs.
