

Manage Articles update: Select all in filter + new progress bar

Last Modified on 12/28/2022 12:24 pm EST

We've added some functionality and a more descriptive interface to the [Manage Articles](#) bulk edit interface.

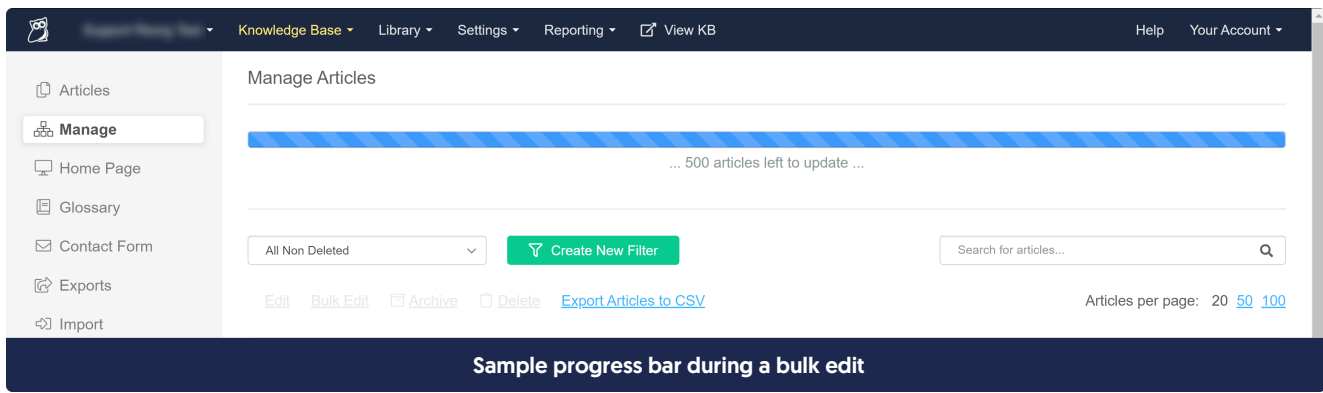

Previously, for bulk edits, you could select all articles on the page. This worked well for a lot of our customers, but we've had requests to add a "select all in filter" option to do bulk edits on a larger scale. We've added this option for bulk edits as well as deletes using the [Delete link](#).

To see the new option, use the checkbox in the header to select all on page, and then you'll see a link to select all articles that match the current filter:

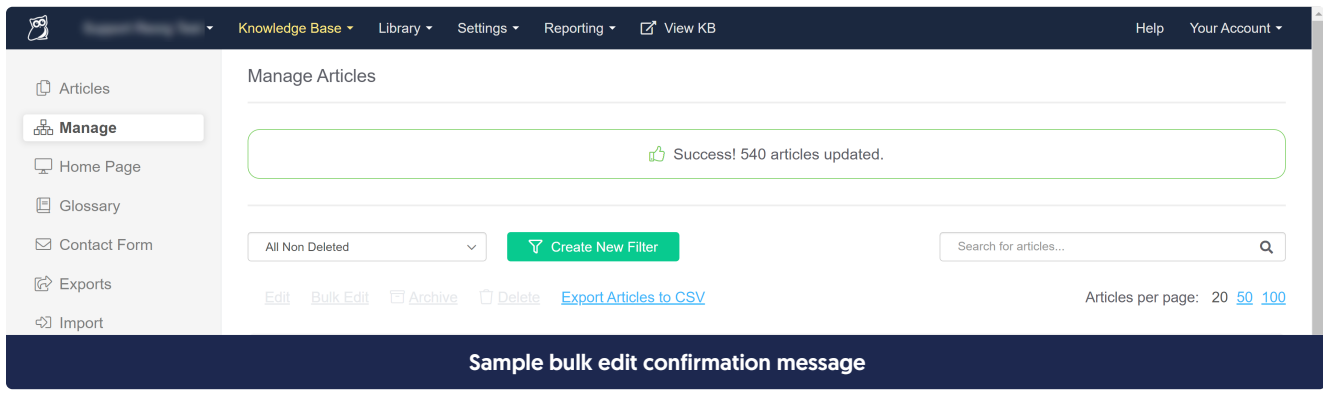

The screenshot shows the 'Manage Articles' interface. At the top, there's a navigation bar with 'KnowledgeOwl Support', 'Knowledge Base', 'Library', 'Settings', 'Reporting' (with a '102' badge), and 'View KB'. On the left is a sidebar with 'Articles', 'Manage', 'Home Page', 'Glossary', 'Contact Form', 'Exports', and 'Import'. The main content area is titled 'Manage Articles' and includes a filter dropdown set to 'All Non Deleted', a 'Create New Filter' button, and a search bar. Below these are links for 'Edit', 'Bulk Edit', 'Archive', 'Delete', and 'Export Articles to CSV'. A table of articles is shown with columns for 'Article Name', 'Status', 'Category', 'Visibility', 'Author', and 'Last Modified'. A blue bar above the table indicates 'All 20 articles on this page selected. [Select all 874 articles that match the current filter](#)'. The table lists four articles: 'Manage Articles overview' (PUBLISHED), 'Recent bug fixes' (DRAFT), 'World Elder Abuse Awareness Day Bug Fixes' (PUBLISHED), and 'Nat'l Iced Tea Day bug fixes' (PUBLISHED). A dark blue banner at the bottom of the screenshot reads 'Sample of the new Select all articles that match the current filter option'.

As part of these changes, we also overhauled how bulk edits are processed, in order to give you a bit more visibility into the process.

Now, whenever you select 10 or more articles for bulk editing, you'll see a progress bar across the top of the screen letting you know how many articles remain:

This progress bar will count down in increments of 50, and you'll see a confirmation message once the update is complete:

We hope these changes let you more effectively edit higher volumes of articles, with more insight into how those updates are progressing.

For more information, check out the updated [Bulk editing articles in Manage](#). You can see a more detailed walkthrough of the progress bar updates in [How do bulk edits/deletes work?](#)
