Manage Articles CSV export updates

Last Modified on 12/28/2022 12:24 pm EST

We've made two small changes to the Manage articles CSV export field list:

- **We renamed the existing Permalink Redirect field to be called Old Links,** since this is what the field is called in the editor itself.
- **We've added a Redirect URL field to the export. If an article has the "Redirect this article to a different URL"** box checked, the URL entered for that URL redirect will appear in this field.

We hope these changes make it easier for you to audit all the ways that you've redirect content within your knowledge base (Old Links) and outside your knowledge base (URL redirect article).
