

Glossary page now handles numbers

Last Modified on 12/28/2022 12:24 pm EST

Thanks to a keen-eyed customer, we recently learned that if you have glossary terms beginning with numbers (like 401k), those terms weren't being displayed on the [Glossary](#) page.

We've made a couple small changes to the Glossary page's behavior:

- **If you do not have Glossary terms beginning with numbers**, you won't see any change to your Glossary page.
 - We reviewed a number of customers' Glossaries and noticed that not many contain terms starting with numbers. We didn't want to move your cheese or add any visual clutter to your Glossary, so if you aren't using terms with numbers, there's nothing else to see here.
- **If you have Glossary terms beginning with numbers**, you will see two changes:
 - At the top of the Glossary, where the letters A-Z appear, you'll now see an option for 0-9. Clicking that will jump you to the numerical section.
 - Terms beginning with numbers will be ordered lowest to highest, with a number heading like you see with letters.

Here's a sample of what this might look like (please don't judge me for my simple examples):

The screenshot shows a web interface for a Glossary page. At the top, there is a teal navigation bar with a menu icon, a search bar containing "Search for articles...", and links for "Contact Us", "Widget Help", and "Logout". Below the navigation bar, the page title "Glossary" is displayed. Underneath the title is a horizontal list of navigation options: "0-9 A B C D E F G H I J K L M N O P Q R S T U V W X Y Z". The "0-9" option is highlighted in green. Below this list, the page content is organized into sections. The first section is headed "3" and contains the entry "3.14" with the description "Pi to two decimal places." The second section is headed "4" and contains two entries: "401k" with the description "Retirement savings option." and "411" with the description "The lowdown." The third section is headed "A" and contains the entry "Appalachian Trail (AT)". At the bottom of the screenshot, a dark blue banner contains the text "Sample Glossary page with numerical terms".

We hope this helps our customers with numerical terms in their Glossary, while also keeping things simple and alphabetical for those of you without them. Let us know what you think!
