

# Add the glossary page to your search results

Last Modified on 03/04/2025 2:58 pm EST

By default, your glossary page doesn't show up in search results. This means that if a reader enters "glossary" in search, the Glossary page won't be in their list of search results automatically. But don't worry--KnowledgeOwl has a setting for this so a link to the Glossary page displays in a box above all other search results:

Sample glossary page  
callout

## Not for use in the Contextual Help Widget

Unlike the [Glossary term callouts](#) functionality, this result will NOT display in [Contextual Help Widget](#) search results.

To turn on this setting:

1. Go to **KB settings > Search and synonyms**. (Or, from the **Glossary** page, select **Edit in settings** next to "Definitions at the top of the search results.")
2. In the **Search page display** section, under **Glossary callouts**, check the box to **Display a link to the full glossary page when a reader searches for the word "glossary"**.
3. Be sure to **Save** your settings.

## Make it your own

Want to change the look and feel of that callout box? Follow the steps in [Style the glossary snippet search results](#) to get what you want. Don't like the word "Glossary" or want to add more explanation to the box? Use the [Search](#) section of the [Customize Default text](#) to change the text that appears there!
