

Add or remove the glossary page from your search results

Last Modified on 06/22/2026 5:07 pm EDT

You can control whether your Glossary page shows up in search results when someone searches the word "glossary". When turned on, if a reader searches for the word "glossary" (or whatever name you've renamed your glossary to!), a link to the Glossary displays in a box at the top of your search results:

Sample glossary page search
result

Not for use in the Contextual Help Widget

Unlike displaying [glossary term definitions in search results](#), this box won't display in [Contextual Help Widget](#) search results.

To turn on this setting:

1. Go to **KB settings > Glossary**. The **Glossary settings** page opens.
2. In the **Display options** section, check the **Search box to Display a link to your glossary page when a reader searches for the word "glossary"**.
3. Be sure to **Save your settings**.

Make it your own

Want to change the look and feel of that callout box? Follow the steps in [Style the glossary snippet search results](#) to get what you want. Don't like the word "Glossary" or want to add more explanation to the box? Use the [Search section of Customize Default text](#) to change the text that appears there!
