

Search for readers

Last Modified on 09/24/2025 11:50 am EDT

In Readers, you can search within the current filter using the search box in the upper right.

Let's assume we have a reader with these details:

- **Login:** owlpacino@knowledgeowl.com
- **Name:** Pacino, Owl

We can search using:

- **The full First Name:** Owl
- **The full Last Name:** Pacino
- **The full email address:** owlpacino@knowledgeowl.com
- **The full domain:** @knowledgeowl.com **or** knowledgeowl.com
- **The full portion of the email address before the domain:** owlpacino
- **First and Last Name separated by a space:** Owl Pacino
- **Reader's KnowledgeOwl ID number**

If the email address contains dashes, our search converts those dashes to spaces and indexes words on both sides, so owl-pacino@knowledgeowl.com would become owl pacino@knowledgeowl.com.
