Feature enhancement for snippets: copy existing snippet

Last Modified on 12/28/2022 12:24 pm EST

We have now added the ability for you to be able to copy any existing snippet in your snippet library. This can be helpful when you want to use an existing snippet as a starting point for a new one, or when you want to make changes to a code type snippet while keeping a record of how the Javascript used to work in the original.

You can find the documentation here: **Copy existing snippet**
