

Set the number of Related Articles to automatically display

Last Modified on 02/19/2025 2:50 pm EST

By default, our knowledge bases are set to automatically display five Related Articles.

You can set this to any number between 1-10:

1. Go to **Customize > Website**.
2. In the **Links and behavior** section, under **Related articles limit**, use the dropdown to select the number of articles you'd like the section to display (1-10).
3. Be sure to **Save** your changes.

Only limits automatic suggestions

This setting only sets the list limit for **automatically suggested** related articles. You can always **manually add** more than this limit and they will display!
