

# Custom content category merge codes

Last Modified on 04/18/2023 12:18 pm EDT

These merge codes can be used in [Custom content categories](#) to display subcategories.

Template Merge Code	Description
<code>[template["content-list"]]</code>	The template content-list merge code will display subcategories in content list format.
<code>[template["panel-list"]]</code>	The template panel-list merge code will display subcategories in subcategory panel format.
<code>[template["icon-cats"]]</code>	The template icon-cats merge code will display subcategories in the icon panel format. See <a href="#">Add category icons to your homepage category panels</a> for additional options of working with this merge code.
