

Add a print icon to the Glossary page

Last Modified on 08/28/2024 11:54 am EDT

By default, the Glossary page doesn't include PDF, email, or print icons. If you'd like to add a print icon to the Glossary page, you can do so using these steps.

Add a print icon like this to your Glossary page

Create a snippet to generate the print icon

1. Go to **Library > Snippets**.
2. Select **+ Create New Snippet**. If you're not familiar with creating snippets, refer to [Creating a snippet](#).
3. Enter a **Snippet Name** like `Glossary Print`.
4. Enter a **Snippet Description**, like `Add a print icon to the Glossary page`.
5. Select the **Snippet Content** dropdown and select **Code Editor**.

6. Copy the code below and paste it into the code editor:

```
<script>
$(function(){
  if($('.hg-glossary-page') && $('.hg-glossary-page').length >= 1) {
    $('.page-header').append('<span class="ko-article-actions"><a href="#" class="ko-js-print" title="Print"><i clas
s="fa fa-print fa-fw"></i></a></span>');
  };
});
</script>
```

7. Select **Create** to finish creating your snippet.

Add the snippet to Settings > Style

1. Copy the **Merge Code Value** of the snippet you created above.
2. Go to **Settings > Style**.
3. In the **Customize HTML, CSS, and JS** section, select **Custom HTML**.
4. Select **Body** from the **Select HTML section to edit** dropdown.
5. Paste your snippet merge code anywhere into the **Body** code editor pane (the bottom is always a good choice). For example:

```
<div class="row hg-site-body slideout-new"
  [template("layout")]
  { {snippet.backToTop}}
</div>
<div class="row ko-site-footer text-center xsize">
  <div>Copyright © 2023 - 2024 Your Company, LLC. All rights reserved.
    <br>Made with <a href="https://www.knowledgeowl.com" target="_blank">KnowledgeOwl</a> 
  </div>
</div>
{ {snippet.glossaryPrint}}

```

6. Be sure to **Save** your changes.

Once you save those changes, the print icon appears on your glossary page:
