

Add a print icon to the Glossary page

Last Modified on 12/28/2022 12:25 pm EST

By default, the Glossary page doesn't include PDF, email, or print icons. If you'd like to add a print icon to the Glossary page, you can do so using these steps.

Create a snippet to generate the print icon

1. Go to **Library > Snippets**.
2. Click the **+ Create New Snippet** button. If you're not familiar with creating snippets, refer to [Creating a snippet](#).
3. Use a **Snippet Name** like **Glossary Print**.
4. Add a **Snippet Description**.
5. Click the dropdown next to **Snippet Content** and select **Code Editor**.
6. Copy the code below and paste it into the code editor:

```
<script>
$(function(){
  if($('.hg-glossary-page') && $('.hg-glossary-page').length >= 1) {
    $('.page-header').append('<span class="ko-article-actions"><a href="#" class="ko-js-print" title="Print"><i class=
  };
});
</script>
```

7. Click the **Create** button to finish creating your snippet.

Add that snippet to **Settings > Style**

1. Copy the Merge Code Value of the snippet you created above.
2. Go to Settings > Style.
3. Below the preview pane, click the Custom HTML tab.
4. Be sure that Body is selected from the dropdown.
5. Paste your snippet merge code anywhere into the Body code editor pane (the bottom is always a good choice).

Custom CSS Custom HTML Custom <head>

Custom HTML **Body** ▾

```
<div class="row hg-site-body">
  <!--<div id="google_translate_element"></div-->
  [template("layout")]
</div>
<div class="row ko-site-footer text-center xsize">
  <div>Copyright © 2015 - <script type="text/javascript">
    document.write(new Date().getFullYear());
  </script> Knowledge Owl Cheese Mongery. All rights reserved.</div>
</div>
{{snippet.glossaryPrint}}
```

6. Be sure to Save your changes.

Once you save those changes, you'll see the print icon appear on your glossary page.
