Reorder and move articles

Last modified on 07/15/2026 3:00 pm EDT

Reorder articles within a category or move articles between categories.

Reorder articles

Reorder categories or articles by rearranging their order in the **Articles** page:

1. Hover over the article or category you want to move so you get the context menu.
2. Select the **Drag to reorder** icon (up and down arrow icon) to the right of the article or category and drag and drop the content where you want it:

   Your browser does not support HTML5 video.

Looking to change levels?
Refer to the instructions in Move categories or articles between levels.

Move articles between levels

In the **Articles** page, in addition to reordering content inside the current level, you can also:

- Move articles and categories to the top category level
- Move articles and categories into other categories (note that some category types cannot contain subcategories)
- Move articles and categories into other subcategories

To complete these types of rearranging:

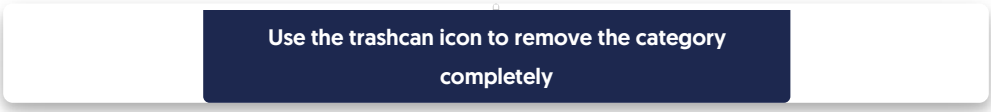

1. Click and hold on the title of the article or category you want to move.
2. To move content into another category, drag and drop it there. To move content out of a category and to the **Top Level Content**, drag it to the Top Level Content pane and drop it in the **Move to Top Level** section:

   Your browser does not support HTML5 video.
3. The Articles page updates as you make drag and drop selections.

If you don't want to mess with drag and drop, you can also change the category an article or subcategory is located in the editor. To do so:

Powered by KnowledgeOwl knowledge base software.

1. Open the article or category you want to move for editing.
2. In the righthand column of the editor, find the **Category** section. If the section is collapsed, expand it.
3. To make the content a **top-level** category or article, select the trashcan icon to remove the category entirely. Be sure to **Save** after making this change!

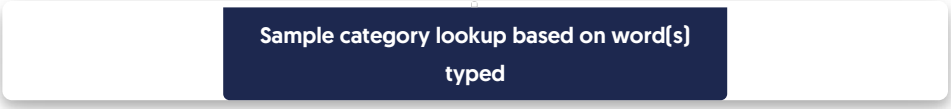

4. To replace the current category with a different category, select **Change category**:

   a. The **Change Article Category** (article editor)or **Change Parent Category** (category editor) modal opens. Start typing the name of the category you'd like to move this content to.

   b. Once you type a few letters, an autosuggested list of categories appears. Select the category you want to switch to.

   c. Once you've selected the category, select **Change Category**.

5. Be sure to **Save** your changes.
