

Nat'l Meatball Day ☒ bug fixes

Last Modified on 01/11/2024 1:32 pm EST

Our developers are working hard at upgrading our code base, so these release notes have been fairly quiet lately, but in the last week we have released fixes for a few bugs:

- Last week, some customers reported issues with [subscription](#) notification emails not going out. We fixed that so they should all be properly sending--let us know if you've still noticed any problems.
 - In the [create readers in bulk](#) workflow, the process was showing a warning to subscribed customers that readers imported during a trial would not be sent a welcome email. We've updated this so the warning is only shown to authors in a trial account. :)
 - A customer who reactivated their trial was having trouble saving changes to categories; we updated this so the trial reactivation works a bit more smoothly.
-
