New feature drop: File Library List View ⊠

New features owl-ways make us pretty giddy around here, and as an avid user of File Library, I am particularly delighted to announce this one:

We've added a List View display option to File Library!

List View lets you:

- Select all files on a page that match the filter/search combo so you can Bulk Label, Delete, or Restore them
- View file size, date created, date last modified (if active) or date deleted (if deleted)
- Sort (both ascending and descending) by: file name, type, size, date created, and last modified (if active) or date deleted (if deleted)

Here's a quick sample of what it looks like:

Files per page: 20 50 100   Display Mode: ⊞ ☰

☐	Name	Labels	Type	Size	Date Created	Last Modified ▲
☐	linus-bw-main-on-dark.svg	🏷 linus 🏷 brand asset 🏷 logo	SVG	3 KB	05/13/2019 9:53am	05/13/2019 9:53am
☐	linus-bw-main-on-light.svg	🏷 linus 🏷 brand asset 🏷 logo	SVG	3 KB	05/13/2019 9:53am	05/13/2019 9:53am
☐	linus-bw-simpler-alternate-on-dark.svg	🏷 linus 🏷 brand asset 🏷 logo	SVG	4 KB	05/13/2019 9:53am	05/13/2019 9:53am
☐	linus-bw-simpler-alternate-on-light.svg	🏷 linus 🏷 brand asset 🏷 logo	SVG	4 KB	05/13/2019 9:53am	05/13/2019 9:53am
☐	linus-for-footer.svg	🏷 linus 🏷 brand asset 🏷 logo And 1 more...	SVG	5 KB	05/03/2021 4:30pm	05/03/2021 4:30pm

To check it out for yourself, head to Library > Files. Look for the new Display Mode selector next to the Files per page. Click the list icon. And behold!

And if you're auditing or updating files soon, I've worked up a quick comparison of the strengths of each File Library view that might be helpful: Which File Library view should I use?

Happy file library list-ing!
