Schedule an article to be published

Last modified on 07/15/2026 4:39 pm EDT

You can publish a new article in one of three ways:

1. Edit the article directly to change the Publishing status to Published.
2. Bulk edit several articles in **Manage** to publish them all at once. Refer to Bulk edit articles in Manage for more detailed instructions.
3. Schedule the article to be published at a future day/time. This page provides instructions on how to schedule publication.

All undeleted articles have the **Schedule** option just below the **Publishing Status** dropdown (old article editor) or visible when you hover over the **Status** field (new article editor). Any article that is unpublished (doesn't have a publishing status of "Published" or "Needs Review") gives you the option to **Schedule > To be published** for a future day and time.

Articles that are scheduled for publication will display information about their schedule in the article editor and in the **Scheduled Publish Date** column of the **Manage** CSV export. Refer to Generate your CSV export for more information on working with the Manage CSV export.

How publication schedules work

When the day and hour arrives, we run a scheduled job in the background to process your scheduled articles. Typically you'll see the scheduled article publish around :10 or :15 after the hour you selected.

What you can expect to see:

- The **Status** changes to Published.
- The **Published Date** is set to the date you scheduled the publication.
- The **Last Modified** date will update when the schedule has run.
- If you added a New or Updated callout, it will display when the article is published. (As long as the callout's expiration date isn't in the past!)
- If you use webhooks, the `article.statuschange` and `article.publish` will log the change.
- If you use Subscriptions and included a New or Updated callout, this article will be included in your next scheduled subscription notification email. (As long as the callout's expiration date hasn't passed!)

How to schedule an article for publication

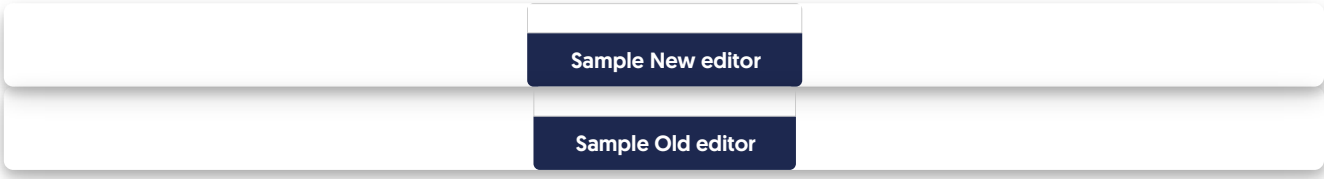

The information below varies based on whether you're using our 2026 new editor or old editor.

To figure out which instructions to follow:

Copyright © 2015 – 2025 Silly Moose, LLC. All rights reserved.
Powered by KnowledgeOwl knowledge base software.

1. Open any article for editing.
2. If the lefthand navigation is collapsed and there's a link near the top of the page to **Switch to old editor**, follow the **New editor** documentation.
3. If the lefthand navigation is expanded and the top of the editor and the righthand column have a heavier grey background, follow the **Old editor** documentation.

Here are side-by-side examples of the new editor and the old editor:

Try out the new editor
We'd love your feedback on the new editor. To switch to the new editor, open any article for editing and select the **Switch to new editor** link at the top of the editor.

How to use the schedule calendar picker

The calendar picker defaults to 12pm on an unselected day in the current month. Select a day in the calendar month to schedule publication for that day.

To switch to a different month, select the **<month year>** label at the top and then select the month you'd like:

To jump to a different year, select the **<month year>** label at the top, select the year, then select the year you'd like to switch to. Then select the month:

How to use the schedule time picker

The calendar picker defaults to 12:00pm. Select a number on the clock face to select a different hour.

To switch between AM or PM, select the lowercase **am** or **pm** in the upper right corner of the picker:
