

Font Awesome 6 now available (icons may look slightly different!)

Last Modified on 12/28/2022 12:24 pm EST

We upgraded the version of Font Awesome we use in app.knowledgeowl.com and in all knowledge bases from version 4 to version 6. 😊

This means that you can now use Font Awesome version 6 icons within your own knowledge base!

We've already enabled Font Awesome 6 in your knowledge base, and if you were using built-in Font Awesome icons previously, you may notice a slight difference, since the icons have changed a bit between versions. You can head over to [Font Awesome's icon list](#) to check out which icons should now be available to you.
