Article Favorites Overview

Last Modified on 11/12/2024 2:03 pm EST

If you use individual **reader accounts** (either directly within KnowledgeOwl or via **Single Sign-on** or **remote authentication**), you can enable Article Favorites. This allows your readers to **"favorite"** up to 10 articles by clicking an icon next to the article title.

You can:

- Choose to **display favorites in your table of contents**
- Use a merge code to **add the Favorites list** to your homepage, right column, and more
- **Control how many favorites are displayed**
- Don't like the star icon? **Change the favorites star icon** to something else!
