

Change how many favorites are displayed

Last Modified on 12/28/2022 12:24 pm EST

Like other article lists, you can set the total number of favorites displayed in the list across your knowledge base, from 1-10.

To do so:

1. Go to **Settings > Basic**.
 2. In the **Article Lists Settings** section, use the **Favorite Articles** dropdown to change the number of articles displayed. (It defaults to 10, the maximum number of favorites a reader can have.)
 3. Be sure to **Save** your changes once you're done making them.
