

# Change how many favorites are displayed in the Current reader's favorites article list

Last Modified on 02/19/2025 3:10 pm EST

Like other [article lists](#), you can set the total number of favorites displayed in the list across your knowledge base, from 1-10.

To do so:

1. Go to **Customize > Website**.
2. In the **Article list settings** section, use the **Current reader's favorites** dropdown to change the number of articles displayed. (It defaults to 10, the maximum number of favorites a reader can have.)
3. Be sure to **Save** your changes once you're done making them.

Refer to [Website settings](#) for more information on the settings available in **Customize > Website**.
