Give your knowledge base a makeover with icon panels subcategory display (Feb. 15th)

Last Modified on 07/10/2024 4:44 pm EDT

Details for our next session:

- **Day:** Wednesday, February 15th
- **Topic:** Following on the heels of updates to our **homepage to display category panels with icons**, we've added a new subcategory display option for **Default categories** to display subcategories with **icon panels**! In this video, we walk you through the new functionality while making some live edits to our Support KB and talk through our recommended workflow for transitioning to the new layouts.

This feature can give your knowledge base a huge cosmetic upgrade with very little work and NO coding required--it's worth checking out!
