

Topic display category tabs layout (April 26th)

Last Modified on 05/18/2023 12:05 pm EDT

Details for our next session:

- **Day:** Wednesday, April 26th
- **Time:** 2:00-2:30pm EDT
- **Topic:** We recently rolled out a new display option for [topic display categories \(tabs display!\)](#). This changes the layout in the category editor a bit. In this video, Kate walks you through those changes as well as the new display option so you can see if it's a good fit for your documentation. If you've been considering using topic display categories, previously used our snippet-based tabs display options, or are already using topic display categories, this should be a helpful session!
