

# Use the Customize Text tool to change your article template (July 5th)

Last Modified on 04/03/2024 12:59 pm EDT

## Details for our next session:

- **Day:** Wednesday, July 5th
- **Time:** 2:00-2:30pm EDT
- **Topic:** We recently added the Article template to the Customize Text tool. This required two unusual changes: we migrated fields from Article Ratings and Comments into Customize Text, and there are a few text strings that require you make some updates to your **Settings > Style Custom HTML**. This session walks through those changes in more detail, especially how to make the Style Settings updates if you want to customize those particular fields!
